User Story:

As a customer, I want to easily browse the variety of products on the store's website to find information, price, and customer reviews that have gone off course. If I decide on a product, I expect a smooth and secure checkout process.

Owner Story:

As owner, I want to easily manage and update my products, ensuring accurate stock levels and pricing, I can provide less shopping experience for customers. I want to analyze sales data and customer feedback to make informed decisions about product restocking, promotion and overall store improvement.
